I. BACKGROUND

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law [Section 590.650, RSMo \(2000\)](#), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to provide the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

[[back to top](#)]

II. STATEWIDE FINDINGS

This report summarizes the data from 622 law enforcement agencies in Missouri for 2014. An additional 61 agencies indicated they made no traffic stops during the year. This represents 97.7% of the 699 law enforcement agencies in the state.

The agencies filing reports recorded a total of 1,681,382 vehicle stops, resulting in 100,038 searches and 81,849 arrests. Table 1 breaks out the stops, searches and arrests by race and ethnic group. **Footnote 1**

Four summary indicators are included in Table 1 that may be useful in assessing racial profiling in traffic stops. The first, termed the “disparity index,” relates each group’s proportion of total traffic stops to its proportion of the driving-age population 16 years old and older. **Footnote 2**

A value of 1 on this index indicates that a group’s proportion of vehicle stops equals its population proportion: it is neither “under-represented” nor “over-represented” in vehicle stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation.

For example, the 1,317,360 whites who were stopped accounted for 78.3 percent of all vehicle stops in 2014.

Approximately 82.8% of Missouri’s driving-age population identified as “White.” The value for whites on the disparity index is, therefore, .95 (.783/.828). Whites were stopped, in other words, at slightly below the rate expected based on their fraction of the population age 16 and older from the 2010 Census.

The same is not the case for several other groups. African-Americans represent 10.9 percent of the population 16 years and older but 18.1 percent of all vehicle stops, for a value on the disparity index of 1.66. This means that African-Americans were stopped at a rate 66 percent greater than expected, based on their proportion of the population of people aged 16 and older.

Hispanics, Asians, American Indians, and persons of mixed or unknown race were stopped at rates well below their proportion of the driving-age population.

The values on the disparity index for the different groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.75 times that of a white motorist (1.66/.95). In other words, African-Americans were 75 percent more likely than whites to be stopped based on their respective proportions of the Missouri driving-age population in 2014.

It should be remembered that the disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of *the residential population* 16 and older, not on the population *of motorists* on the state’s streets, roads and highways. A group’s share of the residential population 16 and older may or may not be similar to its proportion of drivers in the reporting area, and when there is a large discrepancy between the two numbers, the disparity index will be skewed.

When this occurs, it may largely be due to the fact that motorists are often stopped in municipalities, counties, or even states in which they do not reside. For example, a county may have a very low percentage of African-American residents, but a higher percentage of African-American motorists passing through the county due to the location of a state or federal highway. If local law enforcement stops some number of African-American motorists passing through the county, the number of stops may be highly disproportionate to the number of African-American county residents—resulting in a

high disparity index—but less disproportionate to the actual number of African-Americans who drive through the county. Because no data is available for the racial demographics of motorist traffic, it cannot be calculated for purposes of this report.

A second indicator that can be used to assess racial profiling is the “search rate,” or the number of searches divided by the number of stops (x 100). In this report, searches include both searches of drivers and searches of the vehicle and property within.

The search rate for all motorists who were stopped is 5.95 percent. Asian drivers were searched at a rate well below the statewide average, while African-Americans and Hispanics were searched at rates above the statewide average.

Like the stop rates, the search rates for the different groups can be compared directly with one another. African-Americans were 1.73 times more likely to be searched than whites (9.00/5.21). Hispanics were 1.90 times more likely than whites to be searched (9.91/5.21).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups.

Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon, or other reasons. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest, which means that there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

The third summary indicator, the “contraband hit rate,” reflects the percentage of searches in which contraband is found. Contraband was found in 25.1 percent of all searches conducted in 2014. There is some variation, however, in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 26.9 percent, compared with 21.4 percent for African-Americans and 19.5 percent for Hispanics. This means that, on average, searches of African-Americans and Hispanics are less likely than searches of whites to result in the discovery of contraband. This difference may result in part from the higher arrest rates for African-Americans and Hispanics—if there is an arrest, there will be a search whether or not the arresting officer suspects the subject has contraband.

The “arrest rate” is the fourth summary indicator included in Table 1 that may be useful for assessing racial profiling. Just under 5 percent of all vehicle stops resulted in an arrest (81,849/1,681,382). The probability of arrest varies across racial and ethnic groups.

Approximately 7.9 percent of the stops of African-Americans and 8.2 percent of the stops of Hispanics resulted in arrest, compared with about 4.1 percent of the stops of whites.

There are two appendices to this year’s report. Appendix A presents the vehicle stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction.

This year’s report compares the 2014 disparity index to the disparity indexes for 2000 through 2013. These comparisons are presented in Appendix B. **Footnote 3**

For each agency, the disparity index for each race-ethnic group is presented for 2000-2014. For the state as a whole, the key indicators generally show small changes between the years 2013 and 2014.

The search rate (the percentage of stops in which a search is conducted) decreased between 2013 and 2014 for white, African-American, and Hispanic drivers, remained the same for Asians, and increased for American Indians. The arrest rate for African-Americans decreased (from 10.31 percent to 9.00 percent) and decreased for Hispanics (from 10.23 percent to 9.91 percent) between 2013 and 2014.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to encourage those local evaluations and dialogue.

Table 2. Agencies that did not submit reports by March 1, 2015 as required by state law

III. ANALYSIS BY ATTORNEY GENERAL CHRIS KOSTER

Fourteen years ago, Missouri released its first report on vehicle stop data. This report represents the fourteenth annual analysis of vehicle stop data in Missouri, a review that includes information about 1,681,382 million stops by law enforcement in the state during 2014. The report can be compared to data going back to 2000.

The analysis in 2005, 2006, 2007, 2008 and 2009 used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports. The 2010, 2011, 2012, 2013 and 2014 analysis used census estimates from the 2010 census.

As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data.

The overall number of stops reported increased in 2014. As it has in the past, the disparity index for African-American drivers continues to be of significant concern. The disparity index for African-American drivers increased from 1.59 in 2013 to 1.66 in 2014. The disparity index for Hispanic drivers also increased slightly from .61 in 2013 to .62 in 2014. Both groups continue to have search rates significantly higher than that of white drivers.

These findings continue a disturbing trend for African-American drivers in Missouri. The disparity index for African-American drivers has increased steadily over the last fifteen years, with only slight, temporary drops three times: to 1.34 in 2004 from 1.36 in 2003, to 1.61 in 2010 from 1.62 in 2009 and to 1.57 in 2012 from 1.63 in 2011.

The 2014 disparity rate of 1.66 compares to a rate of 1.27 fifteen years ago, and is the highest we have seen since data collection began in 2000.

The pattern is striking: the data tell us that in 2014, Missouri's African-American drivers were 75 percent (1.66/.95) more likely than white drivers to be stopped on Missouri's roads. Just 14 years earlier, in 2000, the difference was only 31% (1.27/.97).

With 622 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

While statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver, the compilation and analysis of data provides law enforcement, legislators, and the public with a starting point as they consider improvements to process and changes to policy to address these issues.

[[back to top](#)]

FOOTNOTES

Footnote 1: Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the "other" category along with persons of unknown race.

Footnote 2: The population totals in the table are from the 2010 Census.

Footnote 3: Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for subsequent years are based on the full calendar year.

Missouri Revised Statutes

Chapter 590 **Peace Officers, Selection, Training and Discipline** **Section 590.650**

August 28, 2013

Racial profiling--minority group defined--reporting requirements--annual report--review of findings--failure to comply--funds for audio-visual equipment--sobriety check points exempt.

590.650. 1. As used in this section "minority group" means individuals of African, Hispanic, Native American or Asian descent.

2. Each time a peace officer stops a driver of a motor vehicle, that officer shall report the following information to the law enforcement agency that employs the officer:

- (1) The age, gender and race or minority group of the individual stopped;
- (2) The reasons for the stop;
- (3) Whether a search was conducted as a result of the stop;
- (4) If a search was conducted, whether the individual consented to the search, the probable cause for the search, whether the person was searched, whether the person's property was searched, and the duration of the search;
- (5) Whether any contraband was discovered in the course of the search and the type of any contraband discovered;
- (6) Whether any warning or citation was issued as a result of the stop;
- (7) If a warning or citation was issued, the violation charged or warning provided;
- (8) Whether an arrest was made as a result of either the stop or the search;
- (9) If an arrest was made, the crime charged; and
- (10) The location of the stop.

Such information may be reported using a format determined by the department of public safety which uses existing citation and report forms.

3. (1) Each law enforcement agency shall compile the data described in subsection 2 of this section for the calendar year into a report to the attorney general.

(2) Each law enforcement agency shall submit the report to the attorney general no later than March first of the following calendar year.

(3) The attorney general shall determine the format that all law enforcement agencies shall use to submit the report.

4. (1) The attorney general shall analyze the annual reports of law enforcement agencies required by this section and submit a report of the findings to the governor, the general assembly and each law enforcement agency no later than June first of each year.

(2) The report of the attorney general shall include at least the following information for each agency:

(a) The total number of vehicles stopped by peace officers during the previous calendar year;

(b) The number and percentage of stopped motor vehicles that were driven by members of each particular minority group;

(c) A comparison of the percentage of stopped motor vehicles driven by each minority group and the percentage of the state's population that each minority group comprises; and

(d) A compilation of the information reported by law enforcement agencies pursuant to subsection 2 of this section.

5. Each law enforcement agency shall adopt a policy on race-based traffic stops that:

(1) Prohibits the practice of routinely stopping members of minority groups for violations of vehicle laws as a pretext for investigating other violations of criminal law;

(2) Provides for periodic reviews by the law enforcement agency of the annual report of the attorney general required by subsection 4 of this section that:

(a) Determine whether any peace officers of the law enforcement agency have a pattern of stopping members of minority groups for violations of vehicle laws in a number disproportionate to the population of minority groups residing or traveling within the jurisdiction of the law enforcement agency; and

(b) If the review reveals a pattern, require an investigation to determine whether any peace officers of the law enforcement agency routinely stop members of minority groups for violations of vehicle laws as a pretext for investigating other violations of criminal law; and

(3) Provides for appropriate counseling and training of any peace officer found to have engaged in race-based traffic stops within ninety days of the review.

The course or courses of instruction and the guidelines shall stress understanding and respect for racial and cultural differences, and development of effective, noncombative methods of carrying out law enforcement duties in a racially and culturally diverse environment.

6. If a law enforcement agency fails to comply with the provisions of this section, the governor may withhold any state funds appropriated to the noncompliant law enforcement agency.

7. Each law enforcement agency in this state may utilize federal funds from community-oriented policing services grants or any other federal sources to equip each vehicle used for traffic stops with a video camera and voice-activated microphone.

8. A peace officer who stops a driver of a motor vehicle pursuant to a lawfully conducted sobriety check point or road block shall be exempt from the reporting requirements of subsection 2 of this section.

(L. 2000 S.B. 1053, A.L. 2001 H.B. 80, A.L. 2004 S.B. 1233, et al.)

Background

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of racial profiling by law enforcement prompted the passage of state law Section 590.650, RSMo (2000), which was enacted Aug. 28, 2000. Racial profiling has been defined as the inappropriate use of race by law enforcement when making a decision to stop, search or arrest a motorist.

Missouri's state law requires that all peace officers in the state report specific information including a driver's race for each vehicle stop made in the state. Law enforcement agencies are required to provide the data to the Attorney General, and the Attorney General is required to compile the data and report to the Governor no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not comply with the law. State law requires that all information be reported to the Attorney General's Office by March 1.

The summary of statewide racial profiling data has been provided by Scott H. Decker, professor and director of the School of Criminology and Criminal Justice at Arizona State University; Richard Rosenfeld, professor in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Jeffrey Rojek, assistant professor in the Department of Criminology and Criminal Justice at the University of South Carolina.

Statewide Findings

This report summarizes the data from 622 law enforcement agencies in Missouri for 2014.

An additional 61 agencies indicated they made no traffic stops during the year. This represents 97.7% of the 699 law enforcement agencies in the state.

The agencies filing reports recorded a total of 1,681,382 vehicle stops, resulting in 100,038 searches and 81,849 arrests. Table 1 breaks out the stops, searches and arrests by race and ethnic group.¹

Four summary indicators are included in Table 1 that may be useful in assessing racial profiling in traffic stops. The first, termed the “disparity index,” relates each group’s proportion of total traffic stops to its proportion of the driving-age population 16 years old and older.²

A value of 1 on this index indicates that a group’s proportion of vehicle stops equals its population proportion: it is neither “under-represented” nor “over-represented” in vehicle stops. Values above 1 indicate over-representation, and those below 1 indicate under-representation.

For example, the 1,317,360 whites who were stopped accounted for 78.3 percent of all vehicle stops in 2014.

Approximately 82.8% of Missouri’s driving-age population identified as “White.” The value for whites on the disparity index is, therefore, .95 (.783/.828). Whites were stopped, in other words, at slightly below the rate expected based on their fraction of the population age 16 and older from the 2010 Census.

The same is not the case for several other groups. African-Americans represent 10.9 percent of the

population 16 years and older but 18.1 percent of all vehicle stops, for a value on the disparity index of 1.66. This means that African-Americans were stopped at a rate 66 percent greater than expected, based on their proportion of the population of people aged 16 and older.

Hispanics, Asians, American Indians, and persons of mixed or unknown race were stopped at rates well below their proportion of the driving-age population.

The values on the disparity index for the different groups can be compared directly to one another. For example, the likelihood that an African-American motorist was stopped is 1.75 times that of a white motorist (1.66/.95). In other words, African-Americans were 75 percent more likely than whites to be stopped based on their respective proportions of the Missouri driving-age population in 2014.

It should be remembered that the disparity index is a gauge of the likelihood drivers of a given race or ethnic group are stopped based on their proportion of the residential population 16 and older, not on the population of motorists on the state’s streets, roads and highways. A group’s share of the residential population 16 and older may or may not be similar to its proportion of drivers in the reporting area, and when there is a large discrepancy between the two numbers, the disparity index will be skewed.

When this occurs, it may largely be due to the fact that motorists are often stopped in municipalities, counties, or even states in which they do not reside. For example, a county may have a very low percentage of African-American residents, but a higher percentage of African-American motorists passing through the county due to the location of a state or federal highway. If local law enforcement stops some number of African-American motorists passing through the county, the number of stops

1 Hispanics may be of any race. About 1 percent of the population designated two or more races. These persons are included in the “Other” category along with persons of unknown race.

2 The population totals in the table are from the 2010 Census.

may be highly disproportionate to the number of African-American county residents—resulting in a high disparity index—but less disproportionate to the actual number of African-Americans who drive through the county. Because no data is available for the racial demographics of motorist traffic, it cannot be calculated for purposes of this report.

A second indicator that can be used to assess racial profiling is the “search rate,” or the number of searches divided by the number of stops (x 100). In this report, searches include both searches of drivers and searches of the vehicle and property within.

The search rate for all motorists who were stopped is 5.95 percent. Asian drivers were searched at a rate well below the statewide average, while African-Americans and Hispanics were searched at rates above the statewide average.

Like the stop rates, the search rates for the different groups can be compared directly with one another. African-Americans were 1.73 times more likely to be searched than whites (9.00/5.21). Hispanics were 1.90 times more likely than whites to be searched (9.91/5.21).

The reasons for conducting a search and the outcome of the search (such as finding contraband) should be considered when making comparisons across groups.

Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon, or other reasons. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest, which means that there is no other reason given for the search other than arrest. Searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

The third summary indicator, the “contraband hit rate,” reflects the percentage of searches in which contraband is found. Contraband was found in 25.1 percent of all searches conducted in 2014. There is some variation, however, in the contraband hit rate across race and ethnic groups.

The contraband hit rate for whites was 26.9 percent, compared with 21.4 percent for African-Americans and 19.5 percent for Hispanics. This means that, on average, searches of African-Americans and Hispanics are less likely than searches of whites to result in the discovery of contraband. This difference may result in part from the higher arrest rates for African-Americans and Hispanics—if there is an arrest, there will be a search whether or not the arresting officer suspects the subject has contraband.

The “arrest rate” is the fourth summary indicator included in Table 1 that may be useful for assessing racial profiling. Just under 5 percent of all vehicle stops resulted in an arrest (81,849/1,681,382). The probability of arrest varies across racial and ethnic groups.

Approximately 7.9 percent of the stops of African-Americans and 8.2 percent of the stops of Hispanics resulted in arrest, compared with about 4.1 percent of the stops of whites.

There are two appendices to this year’s report. Appendix A presents the vehicle stop analysis using the statewide proportions of race and ethnicity, rather than those for each jurisdiction.

This year’s report compares the 2014 disparity index to the disparity indexes for 2000 through 2013.³ These comparisons are presented in Appendix B.

For each agency, the disparity index for each race-ethnic group is presented for 2000-2014. For the state as a whole, the key indicators generally show small changes between the years 2013 and 2014.

³ Caution should be used when comparing 2000 to subsequent years, especially for smaller agencies, because the 2000 figures are based on only four months of traffic data, while those for subsequent years are based on the full calendar year.

The search rate (the percentage of stops in which a search is conducted) decreased between 2013 and 2014 for white, African- American, and Hispanic drivers, remained the same for Asians, and increased for American Indians. The arrest rate for African-Americans decreased (from 10.31 percent to 9.00 percent) and decreased for Hispanics (from 10.23 percent to 9.91 percent) between 2013 and 2014.

A reasoned determination of the existence of racial profiling in a community requires a comprehensive evaluation of the full range of information compiled in the agency reports. This brief summary of selected indicators for the state as a whole is intended to encourage those local evaluations and dialogue.

Table 2. Agencies that did not submit reports by March 1, 2015 as required by state law

Bates City Police Department*	BNSF Railway Police	Camden Point Police Department*	Camden Police Department
Claycomo Police Department*	Crystal Lakes Police Department*	Deepwater Police Department	East Lynne Police Department*

Analysis by Attorney General Koster

Fourteen years ago, Missouri released its first report on vehicle stop data. This report represents the fourteenth annual analysis of vehicle stop data in Missouri, a review that includes information about 1,681,382 million stops by law enforcement in the state during 2014. The report can be compared to data going back to 2000 on the Attorney General's website at www.ago.mo.gov.

The analysis in 2005, 2006, 2007, 2008 and 2009 used census estimates to reflect the changes in Missouri's population since the 2000 census. That census was the benchmark for the previous five reports. The 2010, 2011, 2012, 2013 and 2014 analysis used census estimates from the 2010 census.

As our state's population changes in number and demographics, these census estimates can help provide a more accurate benchmark to analyze the data.

The overall number of stops reported increased in 2014. As it has in the past, the disparity index for African-American drivers continues to be of significant concern. The disparity index for African-American drivers increased from 1.59 in 2013 to 1.66 in 2014. The disparity index for Hispanic drivers also increased slightly from .61 in 2013 to .62 in 2014. Both groups continue to have search rates significantly higher than that of white drivers.

These findings continue a disturbing trend for African-American drivers in Missouri. The disparity index for African-American drivers has increased steadily over the last fifteen years, with only slight, temporary drops three times: to 1.34 in 2004 from 1.36 in 2003, to 1.61 in 2010 from 1.62 in 2009 and to 1.57 in 2012 from 1.63 in 2011.

With 613 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

The 2014 disparity rate of 1.66 compares to a rate of 1.27 fifteen years ago, and is the highest we have seen since data collection began in 2000.

The pattern is striking: the data tell us that in 2014, Missouri's African-American drivers were 75 percent (1.66/.95) more likely than white drivers to be stopped on Missouri's roads. Just 14 years earlier, in 2000, the difference was only 31% (1.27/.97).

With 622 law enforcement agencies conducting vehicle stops in Missouri, there is no single explanation why these disparities exist. This report provides statistical information so the data from each agency can be examined, and appropriate questions asked of those agencies.

While statistical disproportion does not prove that law enforcement officers are making vehicle stops based on the perceived race or ethnicity of the driver, the compilation and analysis of data provides law enforcement, legislators, and the public with a starting point as they consider improvements to process and changes to policy to address these issues.

Agency response

We believe the Key Indicator, Disparity Index, for the "Black" category (2.29) under the Racial Profiling Data/ 2014 is extremely high for Adair County and has been skewed by a couple of factors. First, the population data used as a basis for the statistics is based on the 2010 Census and this data is five (5) years old and does not take into account Adair County's increase in population from that time. The current population is now estimated to be over 25,600. Second, Adair County and the City of Kirksville are home to four higher education facilities—Truman State University, A.T. Still University Medical & Dental Schools and Moberly Area Community College—the majority of whose students come from the St. Louis and Kansas City areas, as well as other metropolitan areas. Additionally, Truman State has a significantly high international student population from 44 different countries. These, too, would be considered "transient" population and would not have been counted in the most recent census count for Adair County. These international and metropolitan areas have a higher percentage of Blacks than Adair County, which would account for an increased percentage of "transient" Blacks at these institutions. Finally, there is a major North-South four-lane thoroughfare which passes through Adair County (Kirksville) and contributes to a significant number (50%) of our overall stops for the "Black" category. Kirksville is the largest city north of I-70 in Northeastern Missouri and provides many medical, legal, economic and social services not available in most of the surrounding counties, prompting travel to Adair County and Kirksville to obtain these services. This, too, would account for the increased Disparity Index. We feel the factors above more than account for the higher Key Indicator, Disparity Index, for the "Black" category under the Racial Profiling Data/ 2014.

Agency response

The population of Ashland in 2013 was 3,823. I realize some of those counted are less than 16 however, as the town continues to grow, the number of individuals in the population, 16 and over, probably needs revision from 2,729. This number has been used to reflect that age group since before 2013. In 2013, the percentage of: white, 95.7%; black, 0.8%; Hispanic, 1.5%; Asian, 0.5%; American Indian, 0.3%; Other, 0.2%; 2 or more races, 1.00%. This updated information should be included along with consideration that our City is bisected by a 4 lane, US Highway than serves the entire State and more specifically, between Columbia and Jefferson City. It brings to our town races of people who may come into contact with law enforcement that are not part of our population count. These contacts skew the disparity index. This results in an inaccurate appearance of over/under-representation in particular race categories. Allowance for these clarifications will provide a more accurate reflection of our driving population demographics.

Agency response

Boone County's population is growing rapidly, experiencing an increase of over 6% since the 2010 census. Current U.S. Census Bureau data estimates Boone County's population at 172,717. The City of Columbia is the metropolitan center of Boone County and is the home to the state's flagship university, two other smaller colleges and many satellite college campuses. Columbia is the regional hub for employment in the education, medical (5 hospitals), insurance and manufacturing industries. Columbia also hosts multiple shopping, sporting and entertainment venues which draw visitors from all over the country. Boone County has the convergence of two major highways (Interstate 70 and U.S. Highway 63), and its population is greater during the day than at any other time with commuting workers.

Agency: Boonville Police Dept.

Population: 6,820

age 16 and over

Agency response

In reviewing the racial profiling data for the Branson Police Department it was discovered there is a disparity index of 2.0 involving vehicle stops on black individuals. It should be noted that according to your information black individuals make up approximately 1.6 % of the city's population. According to the 2010 US Census, black individuals make up 2% and white individuals make up 89% of Branson's population. These numbers are slightly different than those indicated in the racial profiling data. Another consideration that may not have been made was Branson's large population of transient visitors. The City of Branson is a tourism based community. In 2014 we had approximately 7.4 million visitors. We have no way of knowing the racial demographics of this group or how it would impact the racial profiling data report. We do feel confident that our personnel are not in any way involved in any form of racial profiling. Please consider the above two points in regards to the Branson Police Department's disparity index on black individuals.

Agency response

The City of Bridgeton is located near Lambert Airport and consists of a small residential population. There are three major interstate highways; namely, 70, 270 and 370 that run through the City. Also, US highway 67 (Lindbergh), St. Charles Rock Road and Natural Bridge Road are major thoroughfares which also run through the City of Bridgeton. There is a large transient population and work force with many hotels and large industrial employers with in Bridgeton's boundaries.

Agency response

Calverton Park sits between three major interstates 70, 170, and 270. Calverton Park is also located next to St. Louis Community College of Florissant Valley, and University of Missouri St. Louis which a diverse number of vehicles travel through the state lettered highway N and county road North Elizabeth on a daily basis.

Agency response

The Chesterfield Police Department strictly prohibits any and all forms of biased policing (racial profiling) by its personnel. This prohibition of bias policing practices applies to all encounters between police officers and citizens including arrests, consensual inquiries and forfeiture efforts. In addition to providing "Traffic Analysis" data to the Missouri Attorney General's Office annually, meeting all state statute requirements, the department has implemented a number of safeguards in order to prevent and or detect any possible signs of biased policing. The department utilizes monthly Quality Service Evaluations (QSE); randomly choosing sixty individuals who had contact with the agency's personnel each month and mailing them survey forms regarding the quality of services received. A more extensive citizen survey is mailed to every household in Chesterfield once every three years seeking similar input. The results of these surveys are closely scrutinized for possible indicators of biased policing practices. Annual training on biased based policing is provided to all commissioned personnel and a Citizens' Concerns memo is compiled quarterly and reviewed by command personnel for possible evidence of biased police practices. Another means of preventing and monitoring for biased policing practices is through the department's weekly in-car camera audits which are conducted by all supervisors in the Patrol, Traffic & Special Enforcement Units. Each officer in these units has a standard number of their vehicle stops randomly chosen and reviewed by their supervisors each month. The results of these audits are forwarded to the division commander for review. In addition to heading off possible racial profiling practices, these audits often lead to the discovery of equipment failures or potentially unsafe actions by officers and repairs or spot corrections can then be made. Current Missouri law caps traffic fine revenue at 30% of a municipality's budget although there is legislation currently proposed that would reduce that to either 10% or 15%. In Chesterfield for 2014, the total fines and court costs collected was \$1,265,143.15 which is just 2.87% of the City's overall budget and that number includes all summons not just traffic fines. From 2012 through June 2014 Chesterfield officers issued 32,837 citations, excluding warnings. Tickets totals remained fairly level with a 12% increase in citations issued from 2012 to 2013 and a 1% decrease from 2013 to 2014. Of these tickets, 86% were issued to Caucasians and 10% were issued to African-Americans; as compared to the percentage makeup of Chesterfield's service population which is 83% Caucasian and 3% African-American. It should be noted that this data regarding the percentage of African-Americans living in Chesterfield may be somewhat deceiving as the day-time population of Chesterfield, in both numbers and racial/ethnic makeup, is considerably different than those portrayed by the latest Census figures. Because Chesterfield is home to four major retail centers, numerous restaurants and a large light-industrial center,

the numbers of African-Americans working, shopping and otherwise doing business within the city limits is likely much higher than is represented in the City's population. Additionally, Chesterfield has an interstate (I-64) and several large state and county roadways that intersect it and although the racial make-up of those traveling on these roadways is unknown, it is very unlikely that it would closely mirror the racial and ethnic makeup of the city's population. Warnings issued by our officers in lieu of issuing traffic citations increased dramatically from 2013 to 2014; there was a 78% increase in warnings issued from 2854 in 2013 to 5088 in 2014. This increase is at least partially due to a re-emphasis by management and supervision that warnings are in fact a legitimate means of traffic enforcement. This is part of the department's continued efforts to stress that the purpose of traffic enforcement is to make the community safer by serving as a deterrent to drivers committing serious violations and therefore reducing accidents. The Chesterfield Police Department is committed to investigating all complaints of biased policing and conducts an annual administrative review (see Biased Based Profiling Complaints table below).

Biased Profiling			
Complaints from:	2012	2013	2014
Traffic Contacts	1	0	0
Field Contacts	0	0	0
Asset Forfeiture	0	0	0

The department has had only three complaints of biased policing since 2012; all three complaints were found to be without merit. Each was thoroughly investigated to include a comprehensive review of each officer's vehicle stop data for the previous year including a comparison of the department averages for the same data during the same period.

Agency response

The City of Clayton is the seat of government for St. Louis County and, as such, contains the courts and jail, the juvenile detention facility, and other government offices, which are utilized by all residents of St. Louis County on a daily basis. Additionally, Clayton is home to a number of major corporations and contains over 6.5 million square feet of office space and over one million square feet of retail space. According to figures compiled for a recent city survey, the average daily population of Clayton is 46,000, and that number swells to a figure between 70,000-80,000. This includes people who visit Clayton each day to work, shop, frequent restaurants, or otherwise do business. Most of those coming into Clayton are residents of the Greater Metropolitan St. Louis area and beyond. The people who visit travel, primarily, via a number of major arterial roadways and two highways which carry commuters from various parts of St. Louis County. As a result, we have a duty to monitor the safety of the motoring public through significant traffic enforcement. Therefore, for the purposes of this study, we believe the composition of the population should be in direct proportion to that of the Metropolitan Area, or at least in line with that of St. Louis County, rather than simply the resident driving population of the City of Clayton.

Agency response

The City of Clinton is located on the main route between the Kansas City metropolitan area and the City of Springfield. As a consequence, a large number of non-Clinton residents pass through the City of Clinton. Approximately 38% of all traffic stops made by the Clinton Police Department in 2014 took place on state highways. Given the number of non-resident drivers stopped on state highways for traffic violations, any comparisons utilizing the population of the City of Clinton are inherently flawed.

Agency: Cole Camp Police Dept.

Population: 912

age 16 and over

Agency response

The City of Cottleville is located in the middle of St. Charles County. We have a low residential population, however, within the city we have St. Charles Community College, an elementary, middle and high school. These institutions bring in over 15,000 people each day. We also have Calvary and St. Joseph's Church which bring in several thousand people. St. Peters is the municipality bordering us to the east and north. Their population is approximately 54,000. O'Fallon is the municipality bordering us to the west, their population is approximately 82,000 with a county population of 370,000 people. Mid Rivers Mall Drive sees between 30,000 and 40,000 vehicles a day, Highway N sees approximately 12,000 vehicles per day and Highway 364 opened last year with a large portion going through our city limits.

Agency response

The Diamond Police Department is located on Hwy 59 between Neosho to the south and Carthage to the north, Joplin and Monett also add to the daily traffic. During the summer the tourist traffic going to George Washington Carver on Hwy V, to Monett on Hwy J and Elk River, Branson and Table Rock on Hwy 59 expands the traffic flow greatly. The diversity of events in the surrounding cities keeps the law enforcement officers in Diamond active in their endeavors to ensure the safe passage of the visitors and the local drivers, here in Diamond we believe traffic enforcement does keep us safe, we practice firm - fair - and impartial treatment to all.

Agency: Dixon Police Dept.

Population: 1,183

age 16 and over

Agency response

The city of Duenweg is a suburb of Joplin where 80-90% of our traffic enforcement is done on 7th street passing through the business district of our community. Even though our report shows only stopping 13 Blacks in a years time, it tends to show that as a high percentage due to the small number of African Americans which live inside the city. A true and accurate evaluation of our demographic should be the same as the City of Joplin, a city in which we border.

Agency response

The City of Fair Grove has a major U.S. highway through its city limits. U.S. Highway 65 is a major thoroughfare between Interstate 70 and Interstate 44. The City of Fair Grove also has four state Highways within its jurisdiction. Almost half of the Fair Grove Police Department's eight hundred and seventy (870) traffic stops for the 2014 year were conducted on Highways within its jurisdiction. A majority of those stopped for traffic violations on these highways were not citizens of the City of Fair Grove but only passing through its city limits. Please consider this information to help provide a more accurate reflection of the demographics of our driving population.

Agency response

Frontenac has a large section of I-64 and a major shopping mall within our City, which is in the geographic center of St. Louis County. Our daytime population increases by tens of thousands of people. The disparity index used by the Attorney General's Office uses only individual city demographics, as opposed to more realistic county-wide demographics. This method skews the results when viewed in relation to a small city with few minority residents. This is true for other St. Louis County cities with few white residents. Obviously, motorists other than City of Frontenac residents drive on our streets and highways. For years this Department has requested that this comparison formula be revised to include St. Louis County data, which would clearly reflect that Frontenac traffic stops are directly in line with County demographics.

Agency response

The City of Gladstone contains many sizable apartment complexes along major thoroughfares in the city that serve as principal connections to U.S. Highway 169, a well-traveled freeway that connects Gladstone to the City of Kansas City and links our city to the Kansas City International Airport. These apartment complexes offer government-subsidized housing that appear to contain a disproportionate percentage of minority tenants. The City of Gladstone is completely surrounded by urban Kansas City, Missouri. There are several apartment complexes located within the city limits of Kansas City immediately adjacent to the City of Gladstone and seem to house significant percentages of minority tenants. Several of these apartment complexes are accessible only via Gladstone city streets, generating significant motor vehicle traffic-including minorities-through Gladstone. In addition, Gladstone experiences considerable vehicular traffic that originates and/or terminates within Kansas City and does not involve Gladstone residents or their visitors. The combination of freeway access, being surrounded by Kansas City, the concentrations of minority tenants in apartment complexes, the visitor traffic generated by these apartments, and traffic generated from outside our city, attracts a higher percentage of motorists-including minorities-than the proportion of the minority residents of the city would suggest. Gladstone Department of Public Safety has established, and vigorously enforces, policies to ensure minorities are not disproportionately subjected to stops or arrests by our police officers. These policies are reinforced by active supervision and training of our law enforcement officers to assure racial profiling or other discriminatory behavior does not exist.

Agency response

The State's report indicated a driving-age population demographic for the City of Grandview a s49.48% White, 38.51% Black and 8.34% Hispanic respectively. However, our true driving demographics are affected by two major influences which are not reflected in the census data. The first is that the City of Grandview is a first tier city to Kansas City, MO which is bisected by I49/U.S. 71 Hwy; a major corridor direct to the inner city which maintains a high minority population. Much of our evening traffic is made up of motorists traveling to and from the inner city. Secondly, in 2010, the International House of Prayer opened their international university campus in the city center. This campus brings in several thousand very racially diverse students, which operate motor vehicles on our city streets on a daily basis but which are not represented in the census driving population data.

Agency response

In 2014 our African-American minority driving population of 4.75% is comparable to the 2010 census report estimating the segment at 5.4% of the city's total population. The 2014 disparity index for this population of 3.28% is consistent with the past three years. Independence shares a common border with Kansas City Missouri that has an African-American population of approximately 29.9%. Kansas City has invested significant resources in addressing and displacing crime. Independence is a metro destination for dining, shopping, and entertainment with a 20 theater complex, event and sports arena, and significant employment and retail opportunities. A major indoor shopping mall is a regional retail anchor and one of only two in the metro. These factors in conjunction with major Interstate and State Highways running through Independence and a 23.9% African American population in Jackson County do influence the racial composition of the motoring public. The Independence Police Department is a professional law enforcement agency that does not permit racial profiling. Officers receive annual training on cultural challenges and issues. We are committed to ensuring we maintain accountability and the integrity of the racial profiling documentary process in compliance with Missouri State Statute.

Agency: Indian Point Police Dept.

Agency response

Joplin is located in the southwest portion of Missouri. According to the 2010 US Census, the City of Joplin, has a residential population of 51,337. The estimated driving population of Joplin according to the State of Missouri is 39,905. These numbers do not include the number of people that commute to Joplin daily to either work or to visit. According to the Joplin Area Chamber of Commerce, the average daytime population of Joplin swells to more than 240,000. Also, according to the Joplin Area Chamber of Commerce, the market area for Joplin which is a 45 mile radius from 7th and Main is approximately 419,000. These numbers obviously skew the residential population numbers that we are compared to whenever looking at the race of motorists that are stopped by our officers. Joplin also has two major Interstates (I-44 and I-49) that are located inside the City limits. This provides for a large amount of commuter traffic into our city. The Northpark Mall is located within the City limits of Joplin and is the largest mall within a 45 mile radius. Also located within the City limits of Joplin is Missouri Southern State University which states that their enrollment is approximately 5,587 students. We also have two regional hospitals, Mercy and Freeman Health Systems, which serve the surrounding four state area. As you can see, Joplin is a regional hub and our actual service population is much higher than the residential population might suggest.

Agency: Kahoka Police Dept.

Population: 1,642

age 16 and over

Agency response

"Disparity indexes have not fluctuated significantly since the data collection began in 2000. However, these numbers should be interpreted cautiously. Specifically, relying on the census population for ages 16 and over as a benchmark does not provide a realistic picture of the driving population in Kansas City, Missouri at any given time. There are several major thoroughfares that run through the city, including I-29, I-35, and I-70 that contain a large percentage of drivers not reflected in the static census population used for comparison purposes. Additionally, Kansas City is contained within a metropolitan population of approximately 2.0 million, which adds to the commuter population on the major thoroughfares. Also, when examining search rates, the probable cause/authority to search reasons should be considered. By design, the form on which the AG Office submitted the summary report did not include the category Stop Outcome "Other", which was a factor involving 5,961 stops. Lastly, KCPD views vehicle stop data collection as one of many tools to address the issue of racial profiling. Other tools in use by the department include training, community programs, and policies."

Agency response

Interstate 35 runs through the center of Kearney with exits onto 92 Highway where a large, high-volume truck stop is located. State Highways 33 and 92 intersect in Kearney city limits just east of I-35. Within a five-mile radius of the city limits of Kearney are a large number of subdivisions that have a population of more than 18,000 people. Most of these people use the Mo. 33, Mo. 92 and I-35 routes on a daily basis.

Agency: Kelso Police Dept.

Population: 474

age 16 and over

Agency response

Kirksville is home to two major universities whose enrollment data is not totally reflected in the census figure. Truman State University has 672 students listed as other than white. They also have an additional 401 international students not included in the 672. ATSU enrollment for fall of 2014 has 30% listed as non-white. The majority of ATSU students; 99%, come from outside the Kirksville area. Kirksville is located on one of the few major north-south highways (Highway 63) that services northern Missouri and southern Iowa. Kirksville is the largest city for miles and is the cultural/economic hub for a very large area. This expands the pool of those not counted in the city's census information.

Agency response

The City of Kirkwood has two major interstates (I-44 & I-270) which are used by a large percentage of the population in the St. Louis County area. There is also a medium-sized shopping center that is located adjacent to I-44. This center contains a Wal-Mart, Target, & Lowes as the major tenants. On the other side of the street is another medium-sized shopping center that contains a Burlington Coat Factory, Hobby Lobby, Sports Authority, & Petco as the major tenants. All of these businesses attract customers from around the St. Louis Metro area.

Agency response

Since 2001, The City of Ladue and similar communities throughout Missouri are particularly critical of the Attorney General's Vehicle Stops Report because it does not accurately measure the population of individuals (by race or ethnicity) at risk of being stopped by its police officers. This overly inflates the disparity index in Ladue and these communities making it appear as if their officers are racial profiling. The City of Ladue has developed an interactive system that relies on an internal benchmark for monitoring vehicle stops at the individual officer level; Identified additional methods for evaluating vehicle stops and post stop events (i.e. arrests, searches, etc.) that are more precise than the methods used by the Attorney General; and subjected our vehicle stop data to a more rigorous analysis by a nationally recognized racial profiling expert. As always, the City of Ladue Police Department's "training each year will focus on and shall stress understanding and respect for racial and cultural differences, and develop effective officer behavior in carrying out law enforcement duties in a racially and culturally diverse environment"... Sec. 590.650 RSMo

Agency response

Lafayette County has Interstate 70, a major interstate highway, transecting the county from east to west. As well, US Highway 24 and US Highway 13 both transect our county. We are bordered by Jackson County on our west, the Kansas City Metropolitan Area with a population of approximately 674,000 as compared with our population of approximately 33,000. The traffic stops conducted by the Lafayette County Sheriff's Office are not representative of the county population because of the large transient motoring population that use these highly accessed and populated highways.

Agency: Lake Lotawana Police Dept.

Population: 1,608

age 16 and over

Agency response

The city of Lake Saint Louis is bordered by I-70 to the north and I-64 bisects the south end with a recent addition of Hwy 364 as a new connector highway throughout St. Charles County. A large shopping center is just north of I-64 and a retail district lies directly to the south. Workers routinely travel both interstate corridors west to the Wentzville GM Plant and to major employers in O'Fallon and other points east. Due to these factors, calculating a disparity index based on comparison of ethnicity of drivers stopped with the ethnicity of the city's population may be misleading due to the transient traffic.

Contraband hit rate	24.06	27.47	18.35	20.59	20.00	#Num!	12.90
Arrest rate	7.32	5.51	15.21	14.59	3.74	0.00	6.56

Notes: Population figures are from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed race and unknown race.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Agency response

The City of Lee's Summit is a growing city, both in population and diversity. The report reflects an African American population percentage of 7.59%, while Lee's Summit R-7 student data reveals 11.7% of students are African American, likely a truer representation of our demographics. Lee's Summit is also a major hub for retail shopping, serving many communities with underserved shopping needs. Three communities directly to the west reflect a much higher African American population density: Kansas City, MO (29.9%), Raytown, MO (25.1%), and Grandview, MO (40.85%). Lee's Summit attracts many shoppers from this area, thus increasing the diversity of drivers in the City along main corridors such as I-470, M-291, US 50, and M-150. Lee's Summit also attracts a workforce from these surrounding cities. The City and Police Department will continue to remain proactive in promoting diversity in the region.

Agency response

Maplewood borders the City of St. Louis. Manchester Road (within the Maplewood city limits) is a heavily traveled thoroughfare for motorists driving to and from the City of St. Louis. This includes a portion of Manchester Road that comprises the downtown Maplewood shopping district. I would further note that Big Bend Boulevard and Hanley Road (within the Maplewood city limits) are also heavily traveled thoroughfares for motorists driving to and from Highway 40. The City of Maplewood is heavily commercialized and has approximately 510 retail businesses and various locations housing office space. There are two major shopping centers in the city limits; Maplewood Commons and Deer Creek Plaza. New businesses continue to open in Maplewood, which will include in the near future the first Tim Horton's and Gus's Fried Chicken franchises in the St. Louis Metropolitan area. The Maplewood-Richmond Heights High School is located within the Maplewood city limits. The St. Louis County Board of Election Commissioners is headquartered in Maplewood, and Deer Creek Plaza contains a Missouri Department of Revenue Office and other state offices.

Agency: Marble Hill Police Dept.

Population: 1,154

age 16 and over

Agency response

The City of O'Fallon is located in the center of St. Charles County. We have 2 major Interstates – I-70/64 and State Highway 79. O'Fallon also has a major arterial roadway MO K – that connects the 3 highways from north to south and is a major retail corridor. Because of these heavily traveled roadways, our driver population is more diverse than the census population would indicate, making our disparity index artificially high.

Agency: Old Monroe Police Dept.

Population: 195

age 16 and over

Agency response

The City of Olivette has two major highways within its boundaries. I-170 is on the east and HWY 340 (Olive Boulevard) is a major thoroughfare that divides the north and south sectors of the City. In Olivette, over 100,000 vehicles utilize I-170 and over 55,000 vehicles utilize Olive Blvd. daily. Olivette has several employers that employ hundreds of employees which increases the daytime population. In 2014, the Olivette Police Department issued 3,403 traffic citations. Based on the number of residents involved in traffic stops, 57.2% were White, 30.5% were Black, 9.2% were Asian, and 3.1% were Other. These numbers are statistically in-line with the total Racial Profiling population data for the City of Olivette.

Agency: Oran Police Dept.

Population: 993

age 16 and over

Agency response

Raymore continues to increase significantly in population, above the numbers used for comparison from the 2010 census. The Community Development Director for the City of Raymore provided the official population estimate as 19,754 as of July 1, 2013. This number is provided to the City each May for the previous year by the U.S. Census Bureau. The number for 2014 was not yet available at the time of this writing. In 2014, the City issued 97 permits for new single family homes, 12 duplex units and 50 multifamily dwelling units. The number of new single family homes in 2013 was 110, 2012 was 68; in 2011 was 66; and in 2010 was 48. A big box wholesale store relocated from Grandview, Missouri to Raymore in 2013 bringing a diverse, transient customer population with it. Additionally, a large affiliated retail store is located in the same area as the new wholesale store and continues to be the highest "call for service" and arrest location in Raymore. This store is open 24hours and is the only one of such in the southern Kansas City metropolitan area. The total number of stops decreased from 9,846 in 2013 to 6,444 in 2014 representing a reduction of 3,402 or 35%. The total number of minority stops decreased commensurately from 1,668 in 2013 to 1,064 in 2014 representing a reduction of 604 or 36%. A portion of the decrease in the overall number of stops can be attributed to significant staffing shortages within the Raymore Police Department during 2014. Raymore borders communities such as Kansas City, Belton and Grandview with considerably larger and more diverse populations.

Agency response

The City of Richmond Heights is a 2.8 sq. mile City incorporated in 1913 located on the western boundaries of the City of St. Louis. Richmond Heights has three miles of U.S. 64 (Highway 40) running directly thru it. Highway I-170 runs north and south from U.S. 64 to the City limits of Clayton. Located in Richmond Heights is the Galleria shopping mall and the new Boulevard Shopping District. The Galleria Mall and the Boulevard generate approximately 11 million shoppers or visitors each year. Richmond Heights also borders the City of Clayton, which is the County Seat for St. Louis County. Thousands of vehicles travel thru Richmond Heights on a daily basis due to its geographic location. Estimated daytime population of Richmond Heights is 26,000.

Agency response

The Riverside Department of Public Safety by policy and practice prohibits racial profiling. There are factors which dramatically increase the driving population above Riverside's cited driver-eligible population. Those factors include: a daytime population which grows by 87%; the presence of a riverboat casino; bordering on two major metropolitan cities (Kansas City, MO and Kansas City, KS); and state and federal highway routes traveling through the City with a daily traffic count approaching 300,000 vehicles.

Agency response

The Shrewsbury Police Department, an internationally CALEA accredited organization, is committed to the fair treatment of all citizens and visitors of our community. We support the Missouri Attorney General's efforts to better understand traffic enforcement activity and patterns. However, since the data in the Attorney General's report is descriptive in nature and not interpretive, further analysis of traffic stops, arrests and searches is needed so that more meaningful interpretations of the data can be made. Race-neutral explanations need to be considered and ruled out before any possible conclusions relating to disparate treatment can be drawn. Furthermore, we believe it would be more prudent to examine traffic enforcement activity in terms of the population that travels upon a community's roadways rather than its resident population. This would allow the data to then be examined in a much more appropriate context that would take into account the diversity of the surrounding region and the uniqueness of the motoring population of each individual community.

Population figures do not accurately reflect the demographics of the entire driving population. The City of St. John has two (2) major state highways within city limits. Hwy 170 is used by 135,000 vehicles each day. Hwy 180 has nearly 25,000 vehicles each day. The City of St. John has the first major grocery store west of the St. Louis city limits on Hwy 180. Also, Enterprise Leasing offices employing over 1500 employees is located within St. John city limits.

Agency response

The City of St. Louis is approximately 62 square miles in size and lies at the core of the largest metropolitan area in the state. The City is comprised of 79 diverse neighborhoods and 105 city parks, and is home to a world-class zoo and other major museums and visitor attractions. The City hosts every home game for our three major sports franchises, a multitude of concerts and theatrical performances at various venues, and a set of large regional cultural events which includes the second-largest Mardi Gras celebration in the country. While the data compiled in this report are informative, it is important to note that the disparity indices represent proportions of vehicle stops divided by the proportions of racial categories within the resident population only. As a result, a high disparity rate does not serve as proof of racial profiling. Department policy prohibits racial profiling and officers must adhere to the policy. Every commissioned member of the Department receives annual training against the practice of racial and bias-based profiling, as required both by state law and by Department policy. This training is supplemented and reinforced by periodic courses in related topics such as cultural diversity, ethics, and communication skills. The Department continues to work with its officers, local leaders, and community and academic partners to identify best practices as they relate to vehicle stops.

Agency response

The stop data the St. Louis County Police Department collects is helpful in presenting a preliminary picture of the population traveling through and within the county on a yearly basis. However, the demographic statistics of St. Louis County's residential populations, provided by the 2010 Census, does not account for the diverse population traveling throughout the county's 523 square miles on its 3,100 lane miles of roadway. St. Louis County is not only the state's largest population center with approximately one-sixth of the state's population, it is also a major travel, employment, and educational center. Five major interstate highways converge within the county, which is the heart of the greater St. Louis Metropolitan Area (comprised of eight counties across two states). According to a 2013 Missouri Department of Transportation study, St. Louis County has the highest average annual daily traffic numbers in the region, with some portions of the interstate accommodating as many as 200,000 vehicles per day. In a state that serves as a major transportation crossroads for the entire nation, St. Louis County is a significant transportation hub for the state. St. Louis County is home to more than 20 institutions of higher education, eight major malls, and countless shopping plazas. One-fourth of the state's workforce is employed within the county. As a major employer, commercial and educational center, St. Louis County not only attracts residents from the surrounding counties, but outlying counties in this state and the state of Illinois. For all these reasons and more, the population of people traveling throughout the county cannot solely be based on the demographics of its residents alone. Despite the higher than average diversity traveling through St. Louis County the St. Louis County Police Department frequently records disparity indices lower than the state's average. In 2014, our Department received 359,304 calls for service; officers made 19,602 full-custody arrests and 61,592 traffic stops with only three complaints of biased based profiling. All of the complaints were exonerated or unfounded. Of the total number of stops in 2014, officers only knew the race of 7,203 drivers, or approximately 12%, prior to initiating their stop.

Agency response

Thank you for the opportunity to provide an explanation regarding the 2014 summary of racial profiling data for the City of Town and Country. It is unfortunate that our disparity index is based upon the population demographics of the City of Town and Country, which has a population of approximately 11,000 people with an African American population of 2.69 percent. Approximately 400,000 motorists travel through our city limits each weekday with one of the most voluminous interchanges in the state (Interstates 64 and I-270). Our motoring public is reflective of the demographics of the state and St. Louis County, which are comprised of African American populations of 10.9 and 19 percent respectively. The traffic stop data for Town and Country Police Officers indicates that only 3.6 percent of the motorists stopped are residents of Town and Country. The natural implication of this statistic is that the ratio of the race of motorists stopped for violations would reflect state and county demographics, not the City of Town and Country. The Town and Country Police Department is committed to the fair and impartial application of the law while attempting to maintain a safe environment for all people who travel in and through our City limits. A careful examination of the data indicates that our practice matches this policy.

RACIAL PROFILING DATA/2014

Agency: Tracy Police Dept.

Population: 160

age 16 and over

Agency response

Dispute the Disparity Index. Disparity Index fails to take into account several factors that would make the report more accurate. 1) Close proximity to Kansas City, Missouri with several major highways running through Trenton; 2) The presence of a community college with a diverse student body as well as diversity in visitors that are not included within our population numbers; 3) If race of the driver was visible prior to stop.

Agency response

In regards to the summary of racial profiling data it should be noted that the population noted on the Racial Profiling Data is incorrect. The current estimated population from the 2010 census is 4830. In addition the City of Waynesville has Waynesville Regional Airport at Forney Field, which serves the community with air service. Even though it is on Fort Leonard Wood, it is jointly run by the cities of Waynesville and St. Robert and is available for civilian use by private pilots and scheduled commercial passenger service. The major east-west route is Interstate 44; before that, the main highway was US Route 66 which still exists as a scenic route through the area and passes through Devil's Elbow, St. Robert, Waynesville, Buckhorn, and Hazelgreen. Names for U.S. Route 66 vary-at different places it is called Teardrop Road, Highway Z, Old Route 66, Historic Route 66 and Highway 17. The major north-south routes near Waynesville are: Route 17 which crosses Interstate 44 at exit 153 at Buckhorn, runs east through Waynesville, turns north to Crocker, and then runs north out of the county to Iberia. South of Interstate 44, Highway 17 hugs the western edge of Fort Leonard Wood, passes near Laquey, and circles south of the post until it runs out of the county and eventually joins Highway 32 in Roby. Highway T which runs north from Highway 17 at Waynesville to Swedeborg, where it meets and ends at Highway 133 about halfway between Richland and Crocker. Major attractions along U.S. Route 66 include the Old Stagecoach Stop in downtown Waynesville, which is now a museum but began as a tavern and boarding house and is the oldest standing structure in the county. It was used as a Civil War hospital for Union troops who were garrisoned above the city in Fort Wayne, which was demolished after the war. The Old Courthouse Museum downtown Waynesville is near the Old Stagecoach Stop. Seven main school districts are fully or partly within the borders of Pulaski County, not counting two small districts which are mostly within other counties and only have a few dozen residents within Pulaski County. All seven school districts have a high percentage of Fort Leonard Wood military dependents, and over two-thirds of Waynesville students fall into that category. The cities of Waynesville and St. Robert and the Fort Leonard Wood army installation, along with their surrounding rural areas running east to Devil's Elbow, are served by the Waynesville R-VI School District which is by far the largest in the county. The City of Waynesville borders Fort Leonard Wood and is the main entry to Fort Leonard Wood's West Gate. Fort Leonard Wood is a census-designated place (CDP) in Pulaski County, Missouri, United States. The population was 15,061 at the 2010 census. The Fort Leonard Wood Micropolitan Statistical Area comprises Pulaski County. The racial makeup of the CDP was 70.6% White, 16.5% African American, 1% Native American, 2.6% Asian, 0.7% Pacific Islander, Hispanic or Latino of any race were 14.6% of the population. I believe all of the aforementioned information

presented may provide additional information in order to clarify the data and provide a more accurate reflection of the demographics of our driving population. I hope this information will improve our ability to provide a more balanced report to the public.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: Proportion of stops by racial category/proportion of statewide population of that racial category. A value of 1 indicates local stops within a racial category equivalent to that racial groups proportion in the state population. A value less than 1.0 indicates a lower proportion of stops of that racial group lower than its proportion in the state population. A value greater than 1.0 indicates a higher proportion of that racial group than its proportion of the statewide population.

Appendix B: Disparity Index Scores for 2000-2014 Data Compare
